The parenting style that works
against teen drinking.

TalkAboutAlcohol.org

As a parent, have you ever felt like you were speaking a language that your kids couldn't understand and just weren't being effective? Love and Logic is a philosophy of raising and teaching children which allows adults to be happier, empowered, and more skilled in their interactions with children. Love allows children to grow through their mistakes. Logic allows children to live with the consequences of their choices. Love and Logic is a way of working with children that puts parents and teachers back in control, teaches children to be responsible, and prepares young people to live in the real world, with its many choices and consequences. Love and Logic offers adults an alternative way to communicate with children. The Love and Logic techniques produce immediate results because the techniques are simple, practical, and easy to learn. The concepts behind Love and Logic place a heavy emphasis on respect and dignity for children and at the same time allows parents to grasp simple approaches. Implementing the techniques of love and logic will assist parents in: staying calm in stressful parenting situations; learning to create environments that stimulate responsibility, resiliency and academic achievement; preventing misbehavior; avoiding power struggles while setting limits; teaching character, responsibility, problem solving and strengthening communication.

Currently, trainings on Love & Logic are happening at Raymond Central High School. To learn more about Love & Logic or to register to attend one of these.
